

Lancaster Village offers members a Computer Learning Center and Community Life Center.

The Computer learning Center is available 30 hours per week to all residents of Lancaster village. There are 13 networked internet accessible computers for use by children and adults. At the Computer learning Center adults can obtain assistance with their computer skills, resume writing and the youth can use the center for after school educational assistance.

Adjacent to the Computer learning Center is The Community Life Center. The Community Life Center offers a variety of resources that enhance family life and support the community building efforts of Cooperative Members. The Center partners with employment agencies, employers, and educational institutions to sponsor activities that support self-sufficiency and economic self-reliance.

At the Computer learning Center and the Community Life Center our focus is to help members enhance skills they need so they can thrive in today's technology driven world.
